Forex Risk Disclosure:

The National Futures Association (NFA) and CFTC (Commodity Futures Trading Commission), the regulatory agencies for the forex and futures market in the United States, require that customers be informed about potential risks in the forex market. If you don't understand any of the information provided on this page, please contact us or seek advice from an independent financial advisor.

Risk associated with forex trading. Off-exchange foreign currency trading on margin carries a high level of risk and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite.

The possibility exists that you could sustain a loss of some or all of your initial investment and, therefore, you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with off-exchange foreign currency trading and seek advice from an independent financial advisor if you have any doubts.

LiquidityTradingFX.com Market Opinions:

Any opinions, news, research, analyses, prices, or other information contained on this website is provided as general market commentary, and does not constitute investment advice. <http://www.LiquidityTradingFX.com>. Government Required Risk Disclaimer and Disclosure Statement:

CFTC RULE 4.41 - HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

Trading performance displayed herein is hypothetical. Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance trading results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results.

U.S. Government Required Disclaimer - Commodity Futures Trading Commission futures and Options trading has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in the futures and options markets. Don't trade with money you can't afford to lose. This is neither a solicitation nor an offer to Buy/Sell futures or options. No representation is being made that any account will or is likely to achieve profits or losses similar to those discussed on this web site. The past performance of any trading system or methodology is not necessarily indicative of future results. Trade at your own risk. The information provided here is of the nature of a general comment only and neither purports nor intends to be, specific trading advice. It has been prepared without regard to any particular person's investment objectives, financial situation and particular needs. Information should not be considered as an offer or enticement to buy, sell or trade.

You should seek appropriate advice from your broker, or licensed investment advisor, before taking any action. Past performance does not guarantee future results. Simulated performance results contain inherent limitations. Unlike actual performance records the results may under or over compensate for such factors such as lack of liquidity. No representation is being made that any account will or is likely to achieve profits or losses to those shown. The risk of loss in trading can be substantial. You should therefore carefully consider whether such trading is suitable for you in light of your financial condition. If you purchase or sell Equities, futures, Currencies or Options you may sustain a total loss of the initial margin funds and any additional funds that you deposit with your broker to establish or maintain your position. If the market moves against your position, you may be called upon by your broker to deposit a substantial amount of additional margin funds, on short notice in order to maintain your position. If you do not provide the required funds within the prescribed time, your position may be liquidated at a loss, and you may be liable for any resulting deficit in your account.

Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example, when the market makes a "limit move." The placement of contingent orders by you, such as a "stop-loss" or "stop-limit" order, will not necessarily limit your losses to the intended amounts, since market conditions may make it impossible to execute such orders. By viewing any <http://www.LiquidityTradingFX.com> text, audio, visual commentary, video or presentation, you acknowledge and accept that all trading decisions are your own sole responsibility, and the author, Liquidity Trading and anybody associated with <http://www.LiquidityTradingFX.com> cannot be held responsible for any losses that are incurred as a result.

Fibonacci Retracement

Why do we use the Fib tool?

- Fib gives a frame/zone of levels where breakers, orderblock, FVGs are resting. This makes the tool effective as it will be showing a level in price where the market is at a turning point. Fib levels will allow us to buy below the equilibrium at a discounted price.

When should I use Fib as a tool for my entries instead of placing my trades on Orderblock or Supply & Demand Zone?

- We will use Fib for the Daily Cycle entry.

Swing Low

Not Swing Low

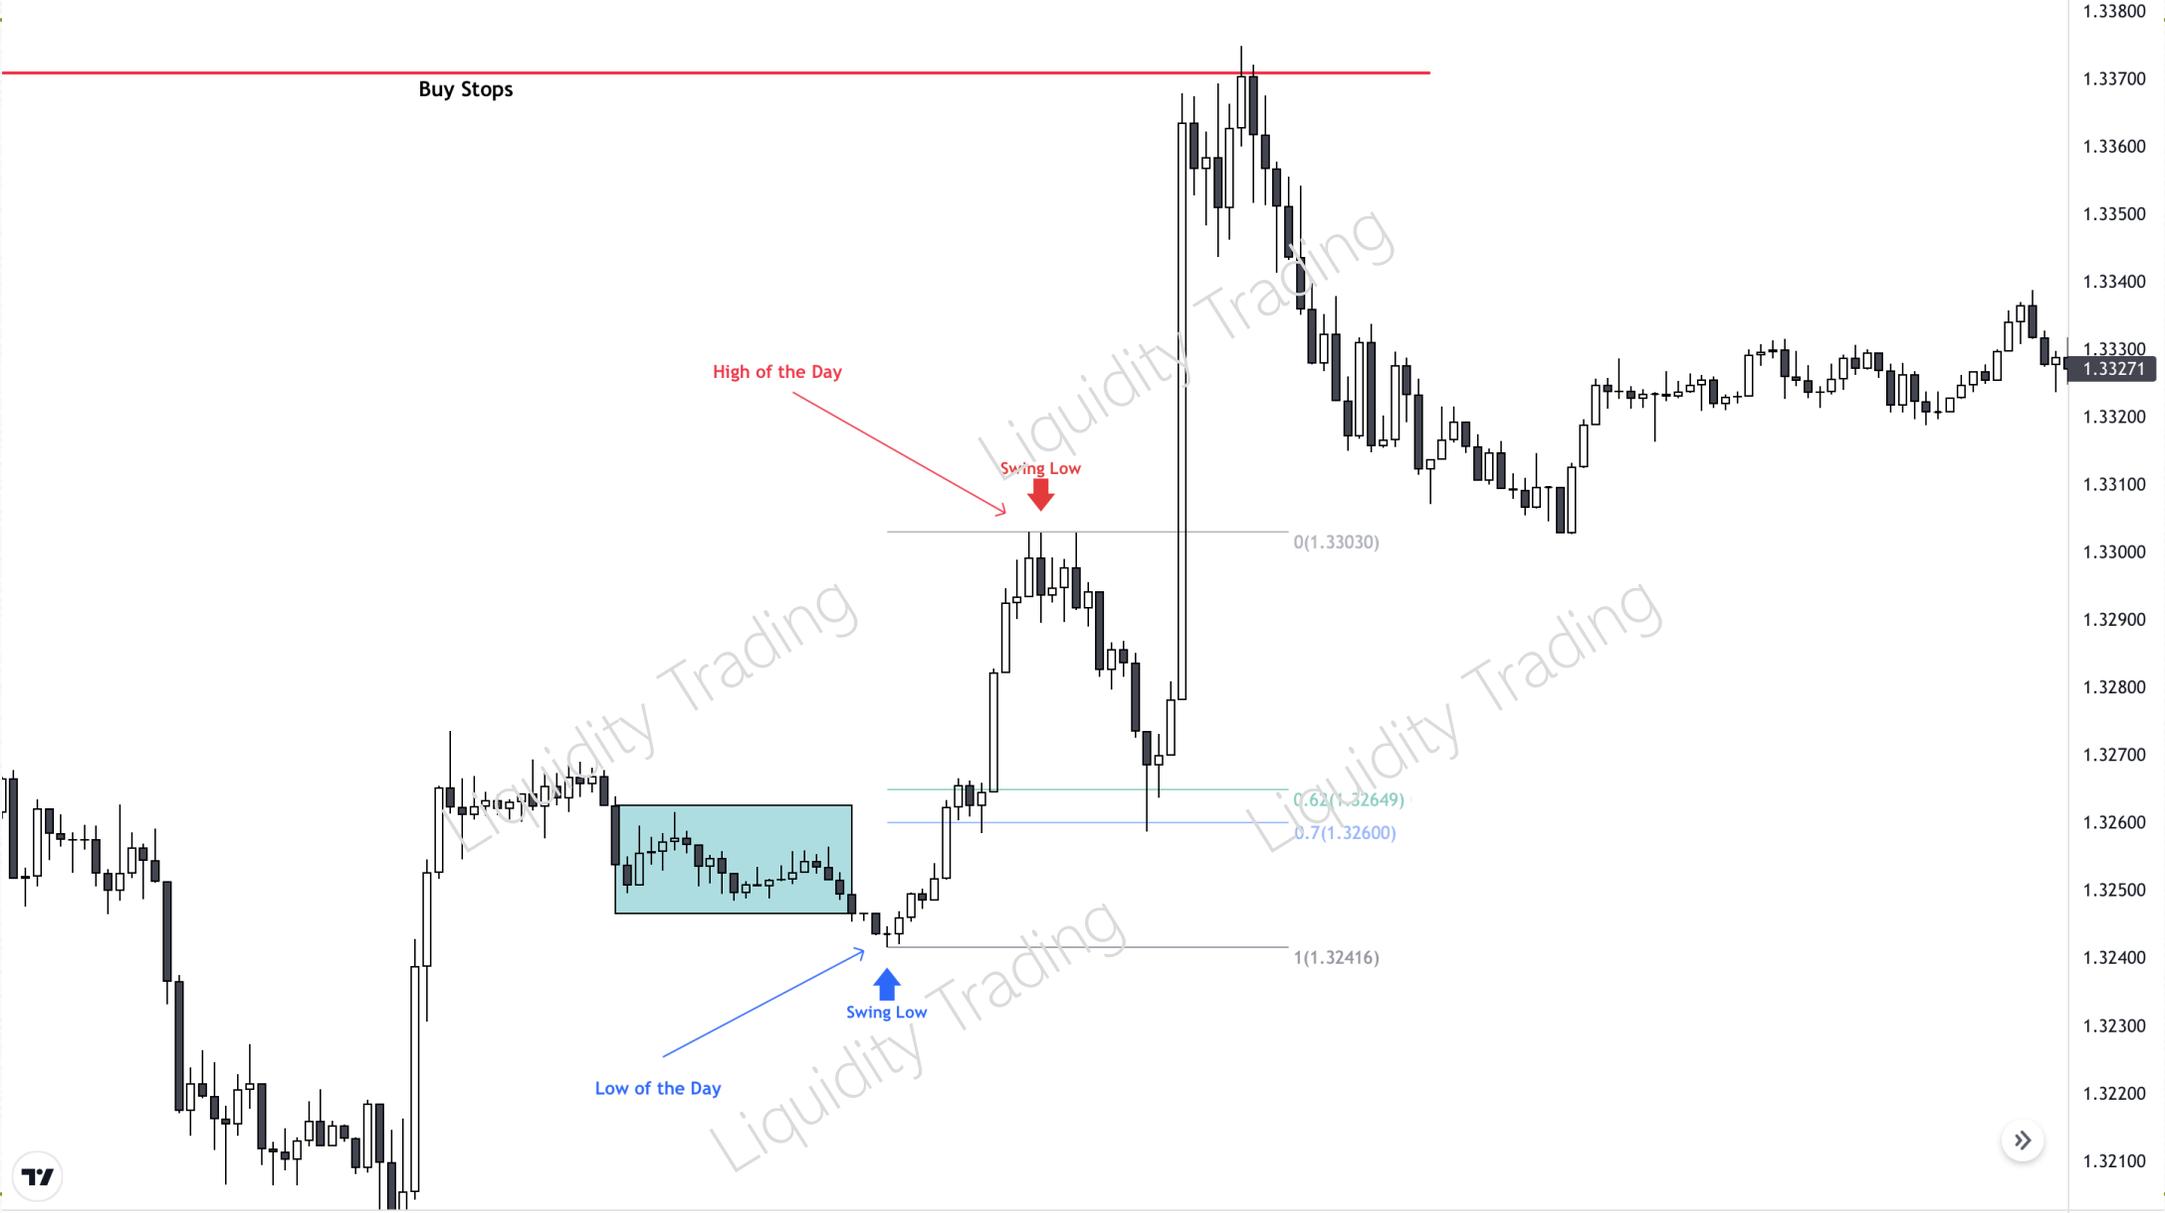

Swing High

Buy Stops

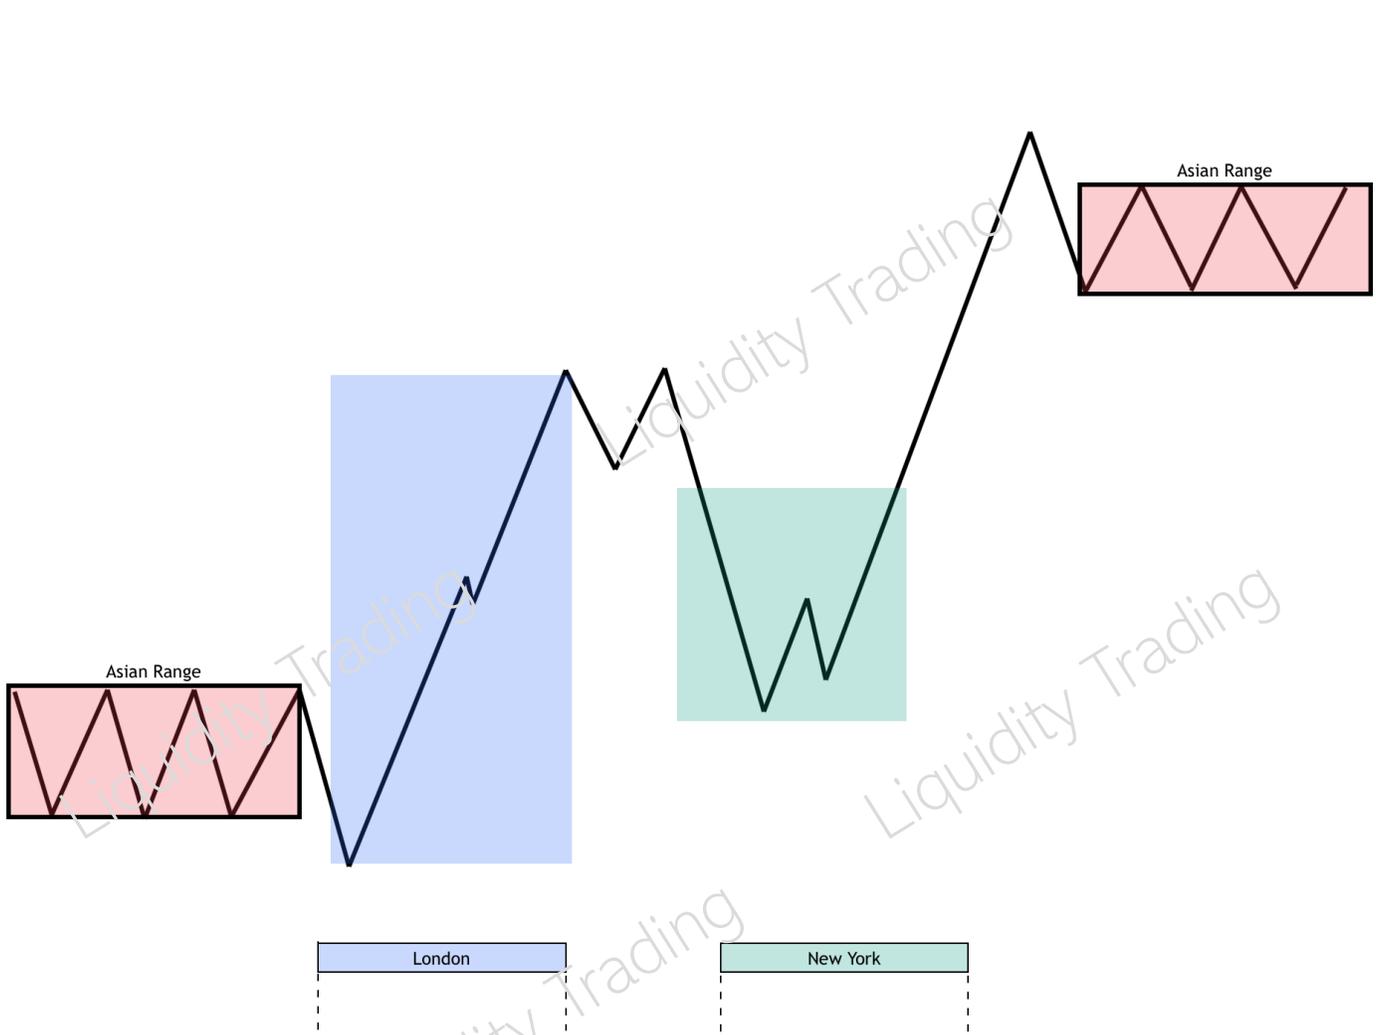

- Use Fib from the wicks of swing highs, and lows.
- Focus on executing your trades at 62% Retracement – OTE level.
- Use Extensions as TP when aligning with Old Highs and Lows.
- Place your stop loss to the swing low on a buy, and to the swing high on a sell trade.
- Use Fib as a tool to frame entry levels with multiple confirmations. These tools won't be consistent without additional confluence.

The Daily Cycle

What is the Daily Cycle?

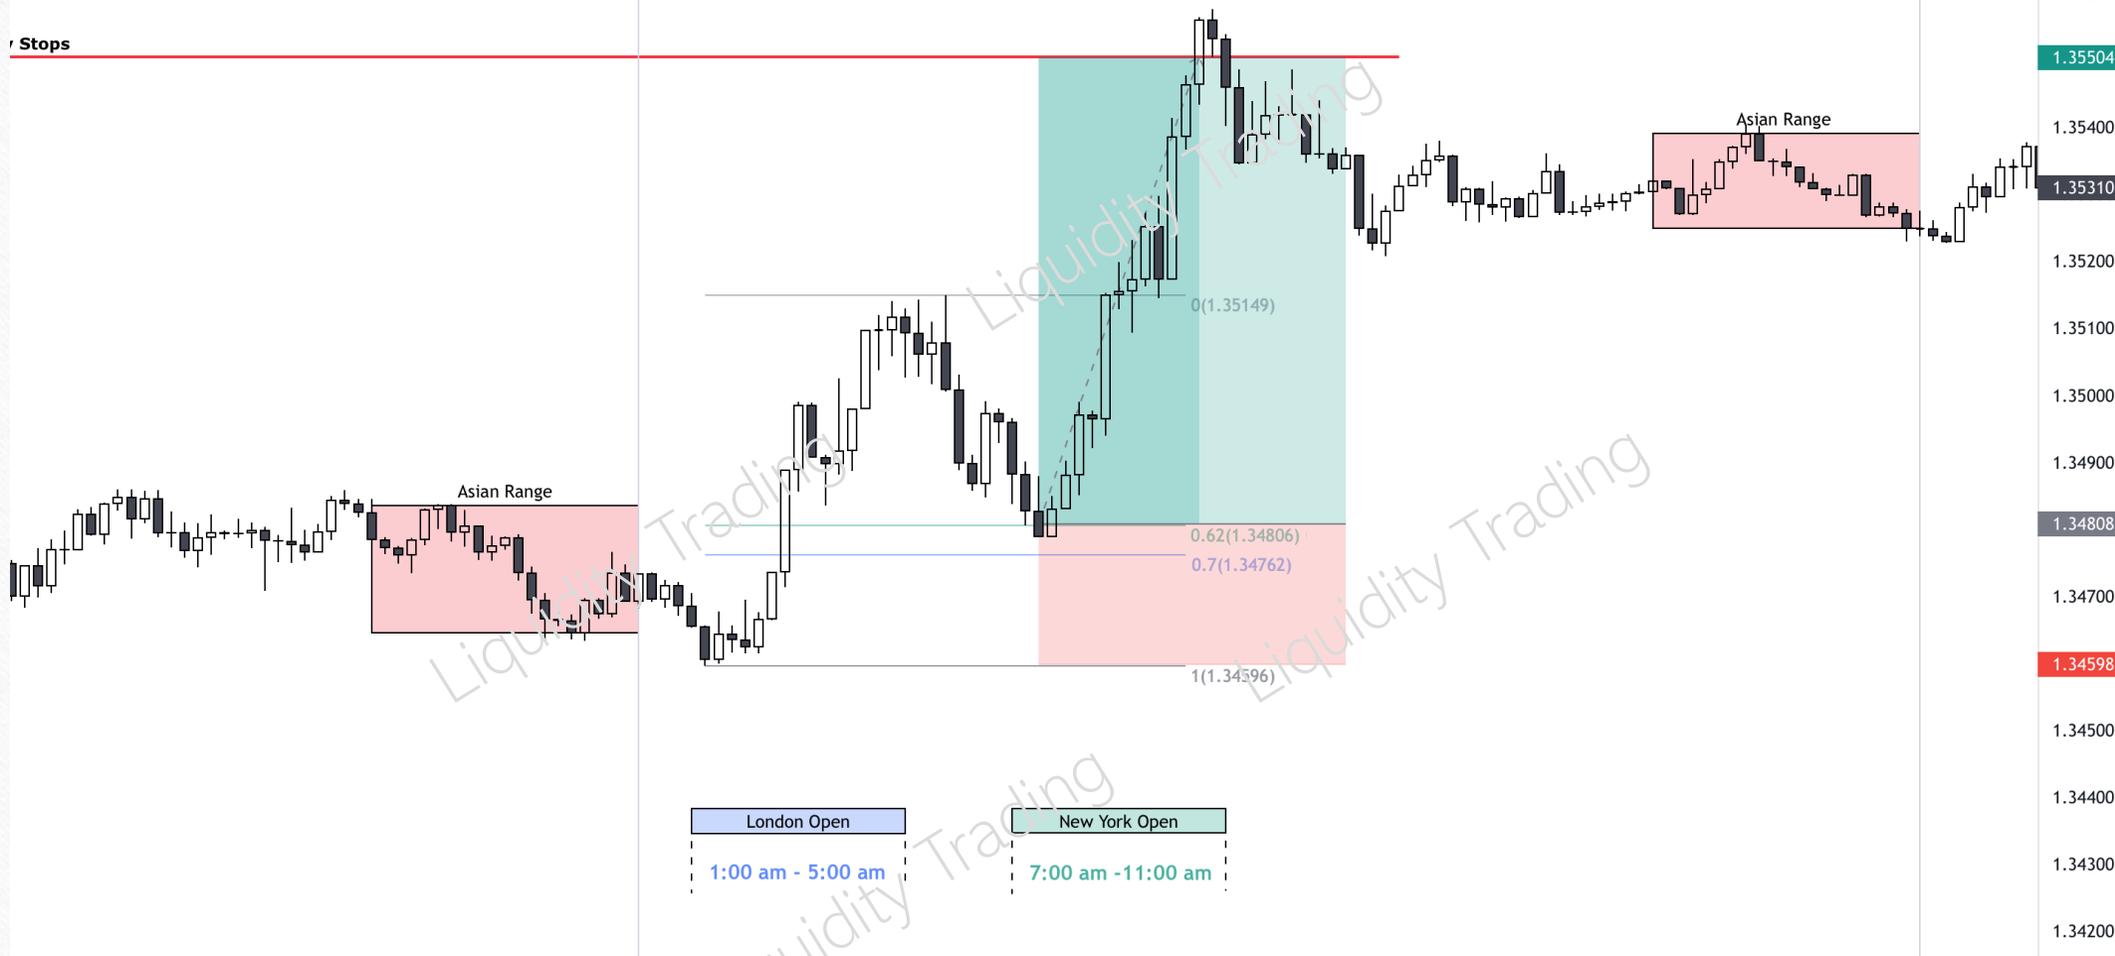

- the daily cycle is the concept that will show you trend directions for the entire day. It can be used to determine the daily bias of your trades, and find the entry level for a day trade.

The Daily Cycle will offer short-term trades – Day Trading – letting you close your trade at the end of the day.

The Daily Cycle

- - London tells you the bias of the day
- - Execute your trade at New York Open
 - - Use Fib to execute Daily Cycle
- - Close your trade before the day ends.
 - - Use 15M & 30M timeframe for this technic
- - Target 1:3 RR with The Daily Cycle

What have we learned?

- Fib tool will give you a framework of all entries, finding the highest probability reversal level.
- Fib extension tool is effective TP level when aligning with an Old high or Low
- The Daily Cycle tells you the direction of the day
- The daily Cycle offers 1:3 or 1:4 RR trade.
