## SUMMARY

Order block is a market behavior that indicates order collection from financial institutions and banks. Prominent financial institutes and central banks drive the forex market. Therefore, traders must know what they are doing in the market. When the market builds the order block, it moves like a range where most of the investing decisions happen.

The market makes a sharp move towards both upside and downside once the order building is completed. The key term of the order block trading strategy is that it includes what the institutional traders are doing. As they are the key price driver, any strategy that includes institutional trading might.

You will see at real time order blocks on any timeframe, with the use of our control panel you will be able to detect regular, rejection and uncanceled order blocks on the history period of choice.

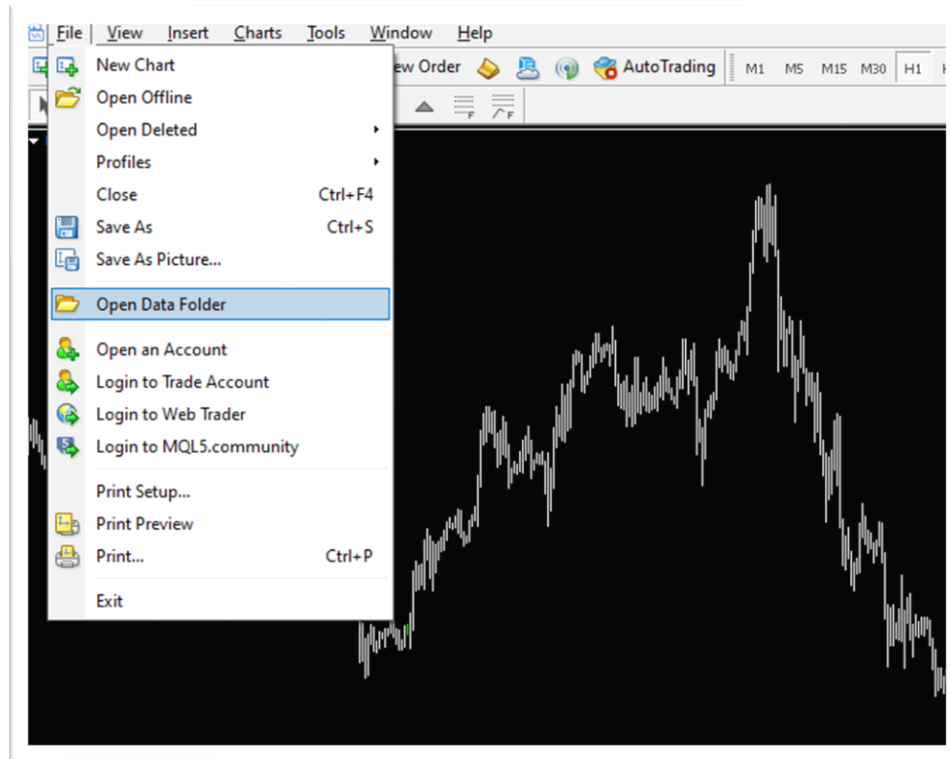

Now you can receive order blocks proximity alerts, we have on-screen notifications on MT4 and push notifications to your mobile phone!

# HOW TO INSTALL

## Step #1

In your MT4 open the **Data Folder**.

## Step #2

Select the **MT4** folder.

Nombre	Fecha de modificación	Tipo	Tamaño
config	25/3/2021 9:14 a. m.	Carpeta de archivos	
history	31/7/2020 7:18 p. m.	Carpeta de archivos	
logs	25/3/2021 9:14 a. m.	Carpeta de archivos	
<b>MT4</b>	31/7/2020 1:14 p. m.	Carpeta de archivos	
profiles	19/11/2020 11:17 a. m.	Carpeta de archivos	
templates	12/3/2021 12:16 p. m.	Carpeta de archivos	
tester	19/3/2021 7:53 a. m.	Carpeta de archivos	
origin.txt	31/7/2020 1:02 p. m.	Documento de texto	1 KB

### Step #3

Select **Indicators** and create a new folder called **Namtech**

Nombre	Fecha de modificación	Tipo	Tamaño
Experts	23/3/2021 9:27 a. m.	Carpeta de archivos	
Files	12/3/2021 2:11 p. m.	Carpeta de archivos	
Images	31/7/2020 1:02 p. m.	Carpeta de archivos	
Include	31/7/2020 1:18 p. m.	Carpeta de archivos	
Indicators	23/3/2021 9:28 a. m.	Carpeta de archivos	
Libraries	23/3/2021 9:28 a. m.	Carpeta de archivos	
Logs	25/3/2021 9:14 a. m.	Carpeta de archivos	
Presets	16/3/2021 5:47 p. m.	Carpeta de archivos	
Projects	31/7/2020 1:02 p. m.	Carpeta de archivos	
Scripts	23/3/2021 9:28 a. m.	Carpeta de archivos	
Shared Projects	31/7/2020 1:14 p. m.	Carpeta de archivos	

Nombre	Fecha de modificación	Tipo	Tamaño
Examples	31/7/2020 1:02 p. m.	Carpeta de archivos	
Namtech	1/4/2021 2:44 p. m.	Carpeta de archivos	

### Step #4

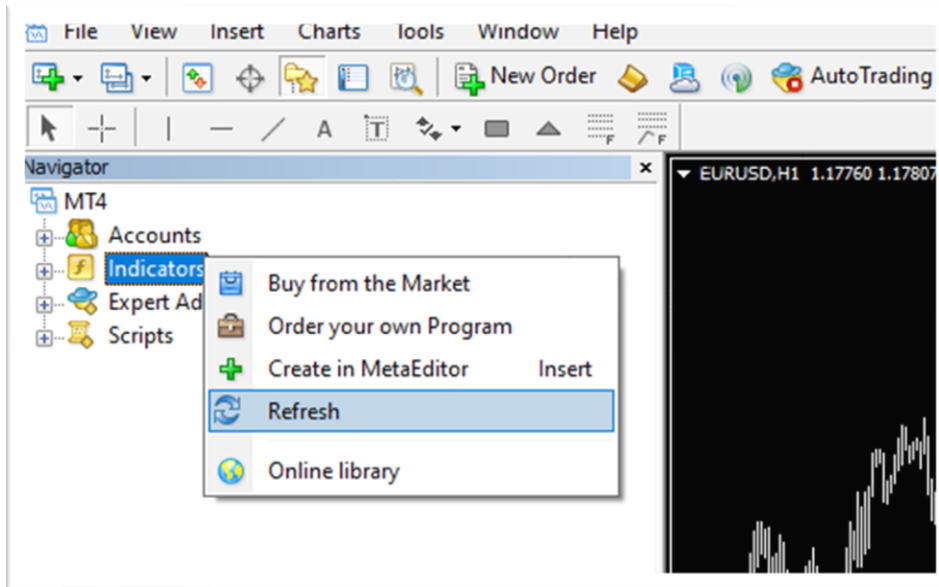

**Copy** the indicator file (**NAM Order Blocks.ex4**) and its icon (**Namtech-Icon.ico**) into **Namtech** folder.

Nombre	Fecha	Tipo
NAM Order Blocks.ex4	9/4/2021 11:01 a. m.	Archivo EX4
Namtech-Icon.ico	31/3/2021 11:19 a. m.	Icono

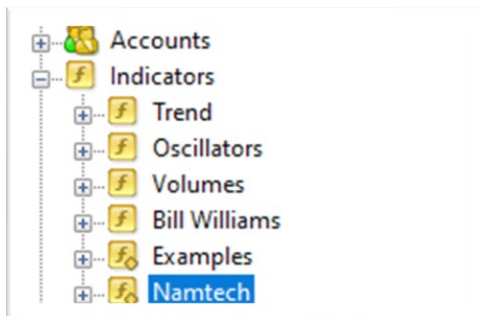

## Step #5

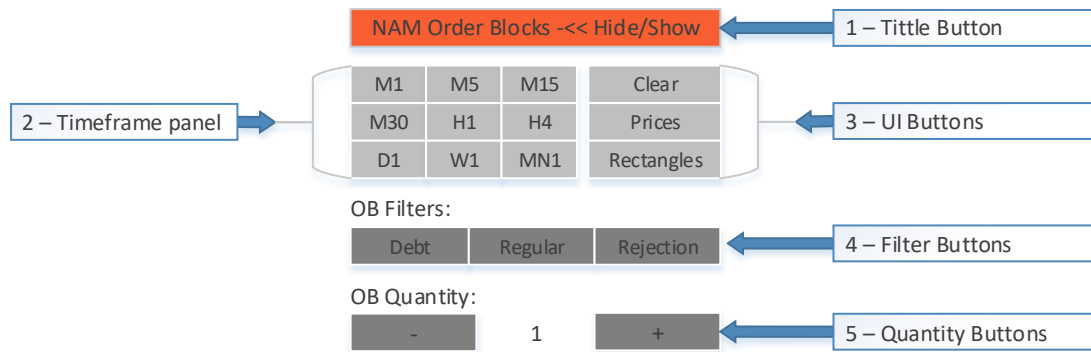

In your MT4 platform “Refresh” the “Indicators” section.

After the **Refresh** process is complete, you should see the **Namtech** folder that contains the indicator.

## USER INTERFACE

1. **Title Button:** This button allows you to hide and display the control panel. When the indicator is hidden, you will be able to move it anywhere on your chart. To hide it simply click on the title button and the control panel will be hidden, then you will be able to relocate it. To display double-click the title button (we recommend clicking on the word "Hide/Show").
1. **Timeframe panel:** This panel allows you to select the timeframes on which the order blocks will be detected. Now without changing your chart's timeframe you can see the ones you need.
2. **UI Buttons**
  - a. **Clear:** Clean the screen of any indicator signal with a single click.
  1. **Prices:** Displays the prices for the order block, such as start, open, and 50% prices.
  1. **Rectangles:** It allows the change of the order block's display signal type, can be displayed as rectangles or as lines.
3. **Filter Buttons:** Filter the type of Order Block to detect. By default, the regular Order Blocks filter is checked, which is automatically disabled when the Rejection filter is selected. For both options, the **Debt** button will filter by non-capitalized Order Blocks.
4. **Quantity Buttons:** Selects the number of Order Blocks detected above and below the price.

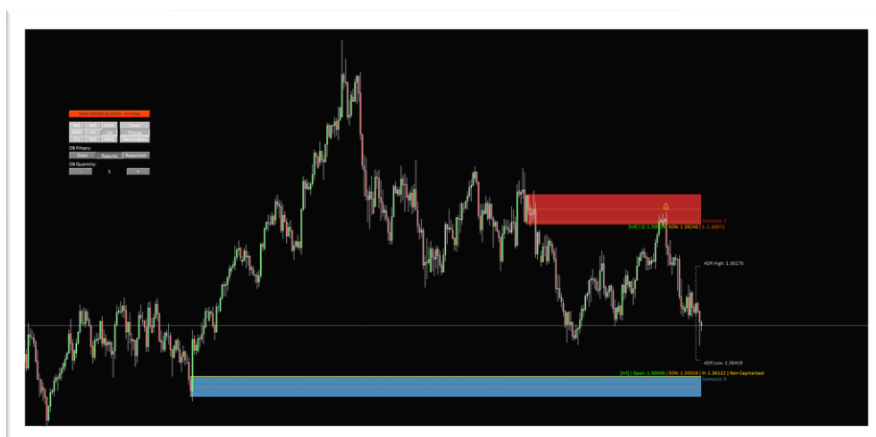

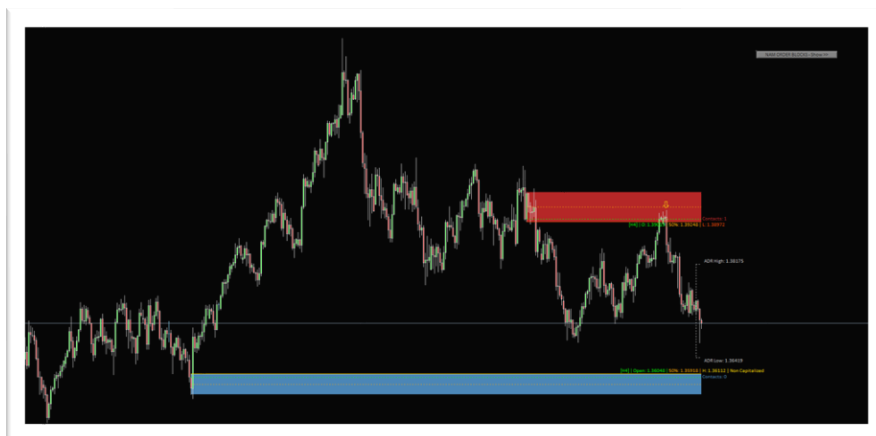

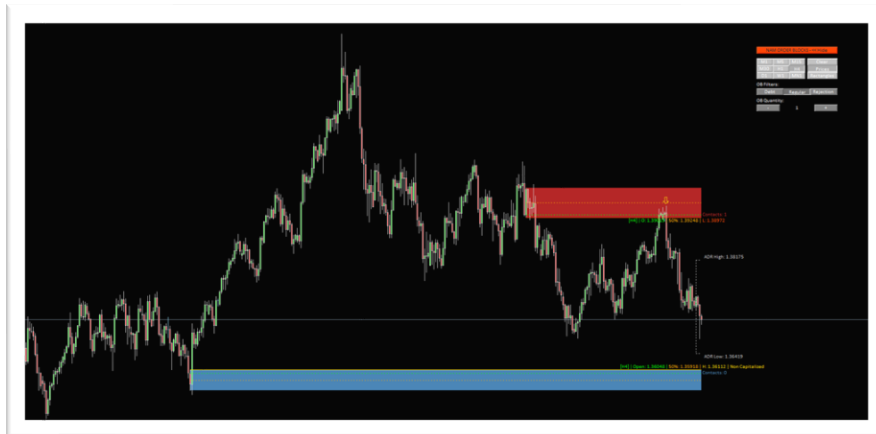

## SPECIAL FEATURES

---

### Panel location

The control panel allows it to be relocated anywhere on the screen, with just one click you can hide it and move it to a different location within the chart.

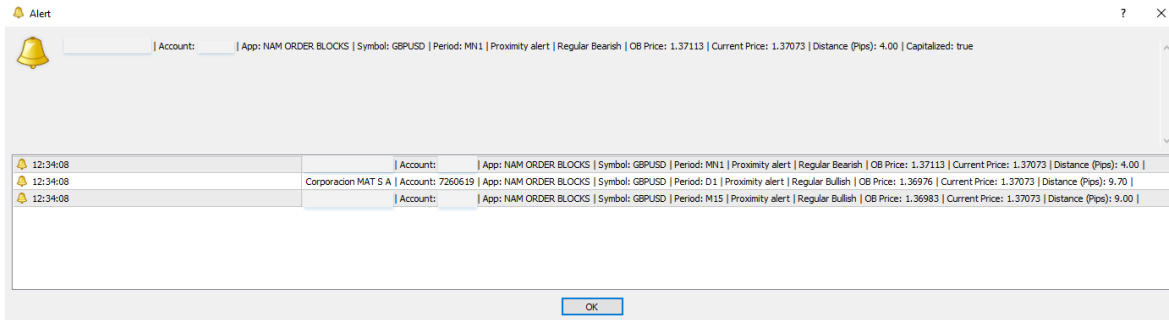

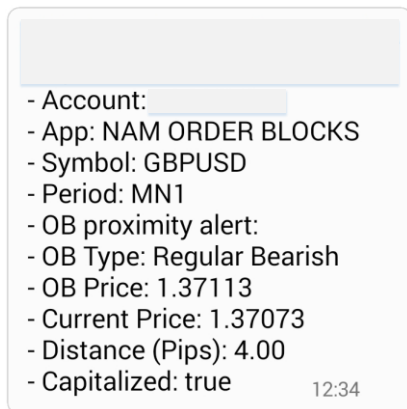

## Order Blocks proximity alerts

Is particularly useful, you can receive on-screen alerts and push notifications on the MT4 app on your smartphone, based on certain parameters such as Order Blocks filters, timeframes, time and minimum distance in price pips with respect to an Order Block.

Example of screen alert:

Example for MT4 phone app:

## Customizing the user interface

Our user interface is fully customizable, you can change colors, font type and font size according to your preferences.

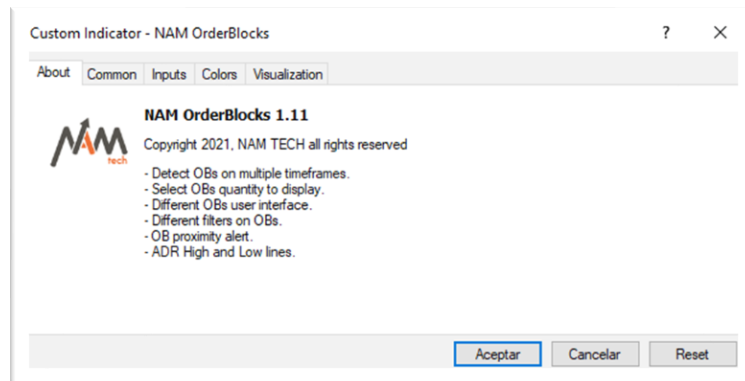

## ADR calculation

We offer the option of signal lines indicating ADR levels. Also offers total customization in periods and interface.

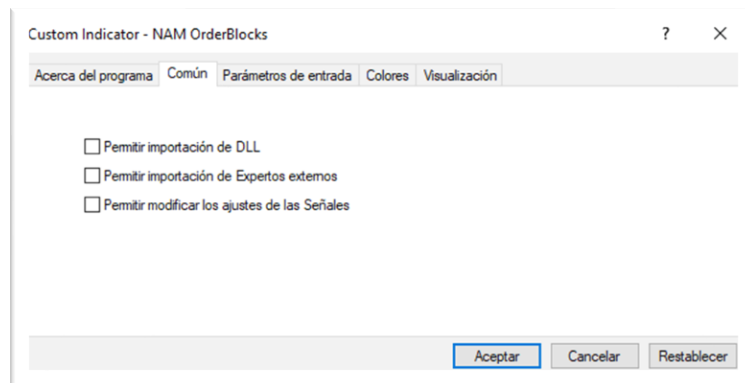

## Parameters

---

### About

## Order Blocks detection settings

Select the following options:

- Left and right bars used to consider a fractal as valid.
- Minimum number of bars that must pass to detect Order Blocks. This avoids signals too close to the price.
- The period in which Order Blocks are detected. It should be noted that the longer it is placed, the more processing that will require the detection of OBs that are far behind in the history.
